

EPF ÉCOLE D'INGÉNIEURS

SCEAUX ■ FRANCE (HAUTS DE SEINE)

EPF trains multidisciplinary engineering generalists for management positions in international settings. Since its founding in 1925, the school has pursued diversity in the service of excellence. Eighty percent of EPF's 9500 alumni are women. Our 2100 students (36% women) have their choice of campuses in Sceaux, Troyes, and Montpellier, where they can earn the same degree and pursue the same goal: to become an innovative generalist engineering capable of adapting to a changing world.

EPF enrolls students on 3 campuses: Sceaux (92), Troyes (10), and Montpellier (34).

◆ MAIN PROGRAMMES OF STUDY

After completing a core undergraduate curriculum required of all students in the general engineering program, fourth-year students choose one of six concentrations: mechanics, environment, information and communication technologies, engineering management, energy, or urbanism.

◆ RESEARCH

EPF's evolving research policy is designed to support the renewal of the framework of competences of the EPF generalist engineer toward the ultimate goal of opening up new career prospects for graduates. Students have opportunities to participate in research projects while pursuing their degree and may enroll in a variety of university master's programs (UTT, ENSMP, ENS de Cachan, among others).

The EPF research is structured within the research center Marie-Louise Paris, named in homage to the school's founder and her pioneering spirit.

This center has four research areas in the fields of:

- MECHANICS (Materials & Composites / Additive Manufacturing & 3D Scanning),
- ENVIRONMENT (Water Quality / Resources Management & Recycling),
- ENERGY (Energy Production / Energy Efficiency in the Buildings).

◆ STRENGTHS

International engagement is one of EPF's major strengths. Students are required to spend a semester abroad. EPF offers bilateral training programs, double degrees, international diplomas, international internships, and study abroad. EPF has partnerships with 152 universities in 46 different countries.

◆ LOCATION

EPF operates 3 campuses in France

- Sceaux campus: Students thrive in an excellent learning environment in a quiet setting several kilometers south of Paris.

- Troyes campus: The city sparkles with life thanks to its 9,000 students. With a relatively low cost of living, the city also offers a unique quality of life in a historic city center full of energy.

- Montpellier campus: Located in the very heart of the city, the campus is close to the train station and the historic center of Montpellier (pedestrians only). The site offers EPF students a pleasant environment in which to live and study.

IDENTITY FORM

- ◆ **Precise name of the institution**
EPF École d'ingénieurs
- ◆ **Type of institution**
Private
- ◆ **City where the main campus is located**
Sceaux ■ France (Hauts de Seine)
- ◆ **Number of students**
2 100
- ◆ **Percentage or number of international students**
15%
- ◆ **Type and level of qualifications awarded**
An engineering degree generalist
Master's degree - Diploma of establishment - Other diplomas
- ◆ **French language courses**
Yes - Summer courses (French language and technical courses)
- ◆ **Programs for international students**
No
- ◆ **Programs in English**
Yes - Engineering Management program in business decision engineering and industrial and logistical engineering - Environment program in environmental and innovative engineering - Master of Science Innovation, Creation & Entrepreneurship.
- ◆ **Registration fees/year (for information only)**
About 7 995 euros
- ◆ **Postal address**
EPF École d'Ingénieurs - 3 bis rue Lakana - 92330 Sceaux
